Another reason for the discrepancy consists in the present book accounting only for generating stations controlled by the People's Commissariat for Ways and Communications, other generating plants not being included. In contradistinction to this, "The Summary of the Fulfillment of the First Five-Year Plan" comprises tentative data for all other stations as well.

B. The column "all regional stations" and "Central Power Board stations" includes a number of factory and local electric stations transferred to the system of the said organisation in course of the First Five-Year Plan Period. To facilitate comparison with the First Five-Year Plan figures, these stations have been excluded from returns covering district stations.

Besides, the present book shows the capacity and output of district stations (according to individual stations controlled by the Central Power Board) without incorporating them into the stations immediately subordinate to the Central Power Board in 1932.

C. Besides the Central Power Board's stations, the following generating plants of district importance have been included under the heading of "All district stations": those of the Azneft and Grozneft Petroleum trusts and of Magnitogorsk and Kuznetsk Metallurgical plants as well as the district heating and power plant of the Berezniaki chemical combine.

CONTENTS

Preface .................................................. 3
Administrative Divisions of the U.S.S.R. .......... 6
The Government and Supreme Administrative Organs of the U.S.S.R. .. 11
Main indices of the development of national economy in the U.S.S.R. .. 18

I. INDUSTRY

1. Total output ........................................ 33
2. Output of large-scale industry ................. 34
3. Production of principal branches of large-scale industry .............. 36
4. Rate of growth of large-scale industry output ........................................ 40
5. Rate of growth in output of principal branches of large scale industry ................................................................................................................. 41
6. Output of main products of large-scale industry .................................. 42
7. Industries of the Constituent Republics and Regions of the U.S.S.R. in 1932 45
8. Fixed capital in large-scale industry ................. 47
9. Replacement of fixed capital in industry ................................................... 49
10. New and completely reconstructed plants in 1932 .................................. 50
11. Share of new plants in total industrial output ........................................... 52
12. Capacity of power plants in enterprises of Industrial Commissariats .......................... 53
13. Electrification of enterprises in the system of the Industrial Commissariats .......................... 54
14. Power supply per worker in enterprises of the four Industrial Commissariats ..................... 54

A. METAL WORKING INDUSTRY
15. Production of machine building industry .......................................................... 55
16. Metal working equipment in various industries ................................................. 60
17. Metal cutting machinery supplied by the home machine building industry ................. 62
18. Metal cutting and metal pressing equipment in the metal working industry ................. 63
19. Metal cutting equipment in metal working industries ........................................... 65
20. Automatic metal cutting machines in enterprises of special order, lot repetitive and continuous-flow types of production ...................................................... 67
21. Electrification of metal cutting machinery in the metal working industries ................. 68

B. POWER
22. Capacity and output of electric generating stations .............................................. 70
23. District power stations: by capacity ................................................................. 71
24. Length of high voltage transmission lines ......................................................... 71
25. Qualitative indices for district electric stations in the First Five-Year Plan Period ........ 72

26. Installation of Soviet made equipment of district generating stations ....................... 72
27. Production of electric energy at district stations classified, according to source of power ................................................................. 73
28. Most important district electric generating stations ............................................. 74

C. COAL INDUSTRY
29. Output of coal in coalfields ................................................................................. 75
30. Mechanization of coal mining ............................................................................. 76
31. Number of coal-cutting machines and chipping hammers: by coalfields .................... 76

D. PETROLEUM INDUSTRY
32. Oil extraction by districts ................................................................................. 77
33. Oil production: by methods of extraction ......................................................... 78
34. Drilling, classified according to purpose and method ........................................... 79

E. FERROUS METALLURGY
35. Output of ferrous metallurgy: by districts ......................................................... 80
36. Old and new blast furnaces: by volume ............................................................ 82
37. Distribution of openhearth furnaces: by hearth area ......................................... 83
38. Blast furnaces: number and capacity .................................................................. 84

F. TIMBER INDUSTRY
39. Lumber industry, 1928/29—1933 ..................................................................... 85

266
II. AGRICULTURE

1. State farm development ........................................... 93
2. Territorial distribution of state and cooperative farms .......... 94
3. Machine and tractor stations entering the 
   "Tractor Centre" system ........................................ 96
4. Collective farm development (as at June 1 of 
   respective year) ................................................ 98
5. Collectivization of peasant farmsteads .......................... 99
6. Number of tractors in agriculture ................................ 101
7. Mechanical equipment of machine and tractor 
   stations and state farms of the People's 
   Commissariat of State Farms .................................... 102
8. Means of production in the socialist sector 
   of agriculture .................................................... 104
9. Capital investments into the socialist sector 
   of agriculture ..................................................... 105
10. Sown area ......................................................... 106
11. Share of socialist sector in sown areas ......................... 106
12. Gross yield of all grain crops in 1933 ......................... 107
13. Number of domestic animals in 1916 and 
   1929—1933 ........................................................ 110

III. TRANSPORT AND COMMUNICATION SERVICES

(Post, telegraph, telephone, radio)

A. RAILWAY TRANSPORT

1. Length of railway lines .......................................... 114
2. Length of electrified railway sections as for 
   January 1, 1934 .................................................. 115
3. Utilization of railway rolling stock ............................ 116
4. Freight and passengers carried by railways .................... 117
5. Freight carried by railways .................................... 119
6. Outgoing passenger principal centres .......................... 121

B. RIVER TRANSPORT

7. Length of internal waterways .................................... 122
8. Freight and passengers carried by water 
   ways grouped according to means of transportation ........... 123
9. Freight carried on inland waterways ......................... 124
C. MARINE TRANSPORT
10. Freight carried by sea ................................ 125
11. Freight handled by principal sea ports ......... 126

D. COMMUNICATION SERVICES
(Part, telegraph, telephone, radio)
12. Main indices showing the work of communi-
cation system ........................................ 128

E. AIR TRANSPORT
13. Work of civil aviation ............................ 130

IV. POPULATION AND LABOUR
A. POPULATION
1. Population: by constituent Republics .......... 133
2. Growth of cities .................................. 134
3. Changes in class composition of urban popu-
lation between 1926 and 1931 ...................... 138
4. Distribution of population, by nationalities .. 141
5. Distribution of population, by age .......... 142

B. LABOUR
1. Number of wage-earners by branches of
labour ........................................ 143
2. Number of wage-earners: by social sectors
and branches of industry ...................... 145
3. Number of wage-earners in all industries: by
republics, regions and territories .......... 148

4. Number of wage-earners in large-scale in-
dustry: by republics, regions and territories 150
5. Number of wage-earners in large-scale in-
dustry: by groups ............................. 152
6. Factory workers (exclusive of apprentices)
engaged in large-scale industry: by republics,
regions and territories ....................... 153
7. Factory workers in principal branches of
large-scale industry (exclusive of appren-
tices) ....................................... 155
8. Large-scale industrial enterprises and total
on pay-roll grouped in order of size ........ 156
9. Wage-earners employed in building construc-
tion: by republics, regions and territories .... 157
10. Wage-earners on state farms and machine
and tractor stations: by republics, regions
and territories ................................ 159
11. Absolute number and percent on female wor-
kers: by branches of national economy .... 161
12. Absolute number and percent of female wor-
kers in large-scale industry ................. 162
13. Labour turnover in principal branches of
large-scale industry ............................ 164
14. Absenteeism of workers in principal branches
of large-scale industry ...................... 165
15. Absenteeism for non-valid reasons among
regular and seasonal workers, on state farms. 166
16. Absenteeism for non-valid reasons in build-
ing construction ............................ 166
17. Annual pay-roll disbursements: by branches
of national economy ...................... 167

D. SCIENTIFIC RESEARCH WORK
16. Scientific research institutes and branches
17. Number of scientific research institutes and branches as at beginning of 1933
18. Number of scientific research institutes and branches: by branches of national economy served
19. Social origin and party membership of scientific research workers conducting independent research

VI. PUBLIC HEALTH
1. Temporary disablement from illness and injury in industry
2. Accidents in industry: Number of accidents incurred while at work per 1000 fully insured workers
3. Health protection
4. Medical aid stations
5. Out-patient medical aid
6. Hospital medical aid
7. Creches: Number of places
8. X-ray equipment in medical and prophylactic institutions in 1932
9. Physical methods of treatment in city institutions in 1932
10. Sanatoria and health resorts
11. Proletarian touring and its organization
12. Physical culture movement
13. Number of physicians and surgeons: by republics

VII. MUNICIPAL SERVICES
1. Municipal utilities in cities of U.S.S.R.

VIII. TRADE AND SUPPLY
1. Retail trade turnover of state and cooperative trade network, including public catering
2. Retail trade turnover
3. Retail trade turnover in cities for 10 years: by sectors
4. Retail trade turnover in rural districts: by sectors
5. Retail trade system: distribution between city and rural districts
6. Retail trade system, distribution between sectors
7. Retail trade system in cities: distribution by sectors
8. Retail trade system in rural districts: distribution by sectors
9. Network of public catering system in cities
10. Urban population served by the public catering system as at July 1933
IX. FINANCE

1. All-Union budget (exclusive of local budgets) 245
2. Aggregate budget: state and local 247
3. National debt 249
4. Number of depositors and amount of deposits in state savings banks 250
5. Credit and clearing operations of the State Bank 251
6. Financing of Union industries by Industrial Bank 251
7. Financing of construction by Central Municipal Bank 252

X. FOREIGN TRADE

1. Exports and imports over all frontiers of U.S.S.R. 256
2. Exports: by commodity groups 257
3. Imports: by commodity groups and articles 258
4. Exports: by countries 259
5. Imports: by countries 260
